

Christian Dave L. Alicaba

Liloan, Cebu, Philippines | christiandave120702@gmail.com | 09565376522

Born: December 7, 2002 (Age: 24)

Objective

Driven Software Developer passionate about full-stack web development and modern software engineering practices. Skilled in designing and building scalable applications with clean architecture, efficient backend systems, and intuitive user interfaces. Dedicated to continuous learning, mastering emerging technologies, and applying innovative solutions to real-world challenges. Committed to delivering high-quality software that enhances user experience, improves business efficiency, and contributes to digital transformation across industries.

Education

- **Bachelor of Science in Computer Science**, ACLC College of Mandaue (2023–2027)
- **Senior High School**, TVL–ICT (Programming), University of the Visayas (2020–2021)
- **Junior High School**, Salazar College of Science Institute of Technology (2017–2018)
- **Elementary School**, Tayud Elementary School (2014–2015)

Technical Skills:

Frontend Development: React.js, TypeScript, Next.js, HTML, CSS, Tailwind CSS, TanStack

Mobile Development: React Native (Expo)

Backend Development: C# (.Net Core), PHP (Laravel), Python (FastAPI), Express.js

Database Management: MySQL, PostgreSQL, SQL Server

Other Tools: Git & GitHub, Docker, Trello , Jira, Figma

Experience:

Hackathon Participant – ViCoSpaces Project *Hackathon 2024*

- Developed ViCoSpaces, a collaborative co-working space app built with Vue 3 and Firebase.

Hackathon Winner – FDA Product Checker ("Totoo Ba Ito?") *Hackathon 2025*

- Created FDA Product Checker, an open-source web app for verifying product authenticity using FDA Philippines databases.
- Awarded Best Overall Open Source Project.

Projects:

Technical Equipment Borrowing System

A full-stack IoT-enabled system for managing resources, tracking items, and monitoring borrowers.

- **Frontend:** React.js, TanStack, Tailwind CSS
- **Backend:** C# ASP.NET Core with SignalR for real-time updates , SQLite , Supabase
- **IoT:** RFID and NFC scanner integration for automated item tracking
- **Purpose:** Designed for school use to ensure smooth lifecycle management and efficient resource tracking.

Quantum Ordering System

Quantum Order is a modern, web-based ordering system designed to streamline the process of browsing, selecting, and purchasing products or services in a fast, user-friendly interface. Built with both customers and administrators in mind, it offers efficient product management, real-time cart tracking, and order monitoring

- **Frontend:** Native Html & Css , BootStrap
- **Backend:** Php (Laravel) , MySQL
- **Auth:** Laravel Sanctum

Veterinarian Management System

The Veterinarian Management System is a comprehensive web-based platform designed to help veterinary clinics streamline their daily operations. This system enables vets, staff, and pet owners to manage appointments, medical records, and pet information efficiently. With a clean interface and role-based access

- **Frontend:** Next.js , tailwindcss
- **Backend:** Php (Laravel) , MySQL
- **Auth:** Laravel Sanctum

FDA Product Checker ("Totoo Ba Ito?") – Hackathon 2025

Open-source web app verifying product authenticity using FDA Philippines databases.

Awarded Best Overall Open Source Project.

- **Frontend** - *React.js* , *TanStack Query*, *Tailwindcss*
- **Backend** - Python (*FastAPI*) , PostgreSQL

ViCoSpaces – Hackathon 2024

Collaborative co-working space app built with Vue 3 and Firebase.

- **Frontend** - *Vue3.js* , *Pinia* , *Fabric.js*
- **Backend** - Firebase

Strengths:

- Determined and curious problem-solver
- Passionate about learning emerging technologies
- Strong analytical and creative mindset
- Committed to innovation and growth

Weaknesses:

- Tends to overanalyze new technologies but uses this to deepen understanding and mastery

Personal Qualities

Curious | Self-Motivated | Tech Enthusiast | Team Player | Lifelong Learner
